

ENVIROGRAF® PRODUCT 39

INTUMESCENT EXPANSION JOINTS

DESCRIPTION

Envirograf® intumescent expansion joints are made from compressible fireproof sponge strips with foil-clad intumescent material on one or two sides. They are unaffected by water or chemicals and are easy to install.

USE

Useful as movement or expansion joints in fire walls, floors, concrete slabs, and steel work, or as a cavity joint between brickwork and timber structures. They can be used around ventilation ducting as a movement and anti-vibration joint, using double-sided tape to adhere to the ducting, and can also be fitted to seal over the tops of cable trays passing through protected building elements.

PERFORMANCE

Tested to BS476 Part 22 (1987), sealing horizontal and vertical expansion joints of different widths, achieving integrity and insulation results of up to 240 minutes. Also tested at VNE to European Standard EN13504-2 (2004).
