

ENVIROGRAF® PRODUCT 106

THRESHOLD RAMPS / DOOR WEATHER SEALS FOR WHEELCHAIRS

DESCRIPTION

The Envirograf® curved ramp and seal system for door thresholds comprises two distinct high tensile plastic mouldings, to be used together or separately. Component DT is a curved ramp moulding containing a carpet pile threshold seal, and component DTE is a curved ramp moulding without the carpet pile threshold seal to meet the carpeted moulding on the other side of the door threshold (or to be used independently to bridge the different levels of non-carpeted and carpeted floors). The gently-curved mouldings are designed with wheelchair users in mind, enabling them to pass over a door threshold or from carpeted areas to non-carpeted areas with ease. Mouldings are available in black, brown, or grey, and the plastic-backed slot-in carpet pile threshold seal is available in black only. Mouldings are screwed into place, and application of flexible mastic sealant to the underside of the mouldings ensures a water-tight seal. This an acoustic, draught, and weather seal made from fireproof material.

USE

When used in combination with other Envirograf® seals on the door, the Envirograf® DT/DTE seal set offers acoustic, draught, and weather protection in situations where a threshold seal is required on a flat surface, particularly where there is no weather bar. In situations where a draught and weather seal is needed for an exterior door, only one section is used in conjunction with an Envirograf® door seal. The seal is suitable for internal or external use in care homes, domestic homes, hospitals, offices, and public buildings, as well as industrial use in factories and warehouses, complying with Document M of UK Building Regulations for disabled people's entrances, with seals as below. The seals are not affected by sea air or water.
