

ENVIROGRAF® PRODUCT 115

HIGH-TEMP SILICONE TAPE SEAL & MASTIC FOR STOVES, BOILERS, ETC

DESCRIPTION

Envirograf® SIL/T is a self-adhesive silicone tape and Envirograf® Stoveseal® is a fibrous, mouldable caulking mastic, and both are suitable for high-temperature applications.

USE

These products can be used on brick, block, and plasterboard walls and chimney breasts, where the temperature is likely to exceed 50°C, particularly around a hole-in-the-wall fire or stove. The area to be treated must be clean and dry.
