

# ENVIROGRAF® PRODUCT 117

## SMOKE CURTAIN

### DESCRIPTION

The curtain is an impregnated glass cloth, sealed with an intumescent coating that will withstand temperatures of up to 1200°C, providing smoke protection and BS476 Class 0 and Class 1 protection. Supplied 1200mm wide. Envirograf® smoke curtain is a very robust, hard-wearing material. Envirograf® Product 117 can also be supplied as a rolled curtain unit supported by an electric motor. When activated, the curtain will drop and (if required) can be re-rolled via a switch.

### USE

For shopping malls and other large areas that need smoke protection and/or BS476 Class 0/Class 1 spread of flame protection. The curtain can be cut with a sharp knife or scissors, and adhesive is supplied so that a 25mm to 30mm overlap can be made, allowing the curtain to be made up to any size required. When fixing the curtain, use Envirograf® FB/C metal straps and Product 15 (Intuplug®) intumescent plugs.
