

ENVIROGRAF® PRODUCT 133

AVG/F ACOUSTIC/FIREPROOF VENTILATION GRILLE

DESCRIPTION

The Envirograf® AVG/F fireproof ventilation grille consists of two parts (one for each side of the opening) and the internal cavity of both sections is filled with micro-acoustic material, with intumescent strips on the two long sides of the risk side opening to provide fire resistance properties. The grille is 25mm deep and in two sizes (200x200mm and 400x200mm). Various finishes are available. The ventilation area is about 0.4 x (slot length in metres).

USE

The grille can be used on partition walls and doors, to prevent fire passing from one room to another. To accommodate the grille, the ventilation aperture must be at least 10mm larger than the height between the upper and lower opposing slot limits (the slots should be vertically opposite each other when fitted).

PERFORMANCE

Tested to European Standards and approved in accordance with the general principles of NEN6069, offering up to 60 minutes of fire protection plus sound absorption.
